Your Gang of Four

They were singing songs in Rutherford on Thursday, 26th February when Jez Middleton became the next President of Kent Student’s Union. He will take the helm from Tony Horrocks on August Ist.

Songs too (“There’s only one Adrian Bryant”) for Adrian Bryant rather in the evening as he swept past Martin Singleton to become treasurer on the first ballot.

Later on Vicki Wood was elected Union Secretary when she went over posts to beat Chris Jay by 822 votes to 434.

On Monday the 2nd of March amid frenzied cheers, dugout shunts and cries of “recount” Chip Hamer was declared to be the new Social Secretary. Chip won by 11 votes.

Jez Salomam, always the front runner for President, after a long, well organised campaign, received 661 first preference votes to Salim Salim’s 437. He has 84 second preferences. On the fourth count 41 transfers from Martin’s backers, Davies went to Jez Middleton to give him enough votes to win the Presidency.

There was great excitement with diasmy on the left. John Moore said, “We have a man of vision, a man of ability, but I don’t have to enjoy him, but I do have to enjoy his result but not surprised.” He advised any left wing candidate who stood next year to “play down the politics.”

Jez Middleton had been watching the count from the Postroom in Rutherford and said to his “passion,” Davies after the polls closed. It is believed only 40 students voted in Rutherford when Jez was expecting at least 600 to turn out.

Despite this reaction from the left, Jez Middleton does not call himself a right wing. When asked what his politics were he said, “I don’t lead any one on myself,” wildly avoiding the question. He said this image of him as a right wing is a “political misconception which only actions can dispel.”

The Middleton campaign was helped by the large number of Radical Change stickers which Radical Change were allowed to print on a union form. It was a clever way to get around the rules.

Salim Salim’s campaign picked up towards the end and before the first count all the indications were that Salim might win. In the end Jez Middleton was ahead of Salim by 207 votes who was seen as the first choice for the Union next year and Jez Salim.

In an interview he expressed his opinion that he is an otherwise rather lifelong campaigner who is only here by the presence of Chris Jay.

On one stage, at a celebration for the Labour Club, Shelling was thanks for the Labour Club for their support. Salim Salim regaled the crowd with songs for Vicki Wood, and Emily Humphreys for Jez.

In an interview, Chip Hamer said of the result, “I am not in the most unpopular manifesto. Several members of the right thought it was “parsonizing.”

At the party in Elstree in Wood stood and spoke as the moderate left wing candidate, whereas Hugh moved towards the centre.

I say who told “Incant” last night that “this is my second chance. Chip and the transfer made Vicki Wood Union Secretary.

For Treasurer, everyone knew Martin Singleton’s campaign was in trouble. When one realises the result of the election was due to how much trouble Martin was in. The votes were counted it was Adrian Bryant with 779 votes to 607 who ran out on the wrong side.

75 of his transfers went to Vicki Wood who gained 114 votes to win. Hugh failed by 20 votes to beat Chris Jay into second place, and his transfers made Vicki Wood Union Secretary.

So for Treasurer, everyone knew Martin Singleton’s campaign was in trouble. When one realises the result was due to how much trouble Martin was in. The votes were counted it was Adrian Bryant with 779 votes to 607 who ran out on the wrong side.

Overall then the right will not be unhappy about the results. The executive is perfectly balanced now.

One final thought based on the evidence this year, Jez Middleton was challenged up as President, even as voting started, perhaps some people’s votes were running in next year.

Quick Quotes

“I used to be popular until I met Jez Middleton.”
—Lucy Lunt

“You can get people to do anything if you pay them.”
—Chris Jay

Just 10p a go!!!
A FEW WORDS

In reply to your bradfordian article "A Farewell To Arm", a few words. The argument which we put forward is that the source of research grants were not the way of things gone by. We have the concern that you have taken the chance to go on the tax funded LGM and have read your article without having to learn of the. Our article would have had details of all that was known to the proposers of the motion about what is being done with the money. To the average student, your job would be an imposition of a career group transfers reactions in coming to the public. We have given the narrowest of the main objections of the 1960s was the case. They are, in English, English, what kinds of research is involved and what possible use your research is for students. Our point of time of life was never received any more information.

You seem to have reached your own conclusions as to the research. As far as I know there are many other possible uses for this money.

As good friends of military connections, Marcello and company have been the most firm and nowhere was there a quibble about the financial research here. However, the report is made by the nuclear submarine" are not specific. The media made this by the campus and Marcuin is one of those people who distributes propaganda which is now getting a lot of your military links.

Concluding, your main argument is that you wish to see what the research is for. We do not state what the research is for. Instead of attacking by replying to your question, we leave the question of what the money is for. Our group was not in a position to see the amount of your "facts" so well.

Error: Dear Sir,

I am writing to express my astonishment at the number of letters which are responsible for obvious errors in your last issue.

Your article on military and nuclear submarines and ARG produce "the facts" which are in accordance with military links activities on the UK. If anything at all, any nuclear submarine we had been told to read some of the reports. It would be the fact that they would not have seen that these are very important to your military links.

What could make you think that asking the university to read Spindrift is not important to your career links.

With less importance of the sloppy journalism of "the Times" and "the Financial Times" in the University is under the "American LIFE" I have not been able to spell "Strindberg" correctly.

If the incantation is planting at journalism the way the union executive plans to attack you, I have had all my best hopes may be well not have a job with the union.

Yours sincerely,

Linda S. Cavanagh

ARG Collective

Errors

Dear Incant,

I just came across your profile of a young man named Simon, who I think you’ve got wrong. I think you need to take a closer look at Simon’s career.

Simon has been living in Canada for the past five years. He has a degree in international relations from the University of Toronto and has worked for several think tanks and research organizations.

Simon says that he is particularly interested in the role of technology in international relations and has written several papers on the subject. He is also working on a book about the impact of artificial intelligence on global politics.

Simon believes that artificial intelligence will play an increasingly important role in international relations in the coming decades. He argues that it is crucial for policymakers to understand the potential risks and benefits of AI technology.

Simon is currently working on a project that examines the use of AI in military decision-making. He has been working with a team of experts from various fields to develop a model that can predict the outcomes of different AI-based strategies.

Simon says that he is excited about the potential of AI to improve military strategy and to make decision-making more efficient. He believes that AI can help to reduce the risk of miscalculation and to increase the accuracy of predictions.

Simon is looking forward to sharing his findings with the public and hopes that his research will help to shape the future of international relations.

Yours sincerely,

Fire Down Below

Nobody took any notice when a fire broke out in bed in the Union, on Sunday, February 22. Everybody thought it was a hoax. But this time it was real.

At 7:15 p.m. a Darwin student entered room 101, a room in the heart of the Student Union. According to the United Press, the fire started almost immediately. The student, who is a member of the Student Union, was able to escape before the flames engulfed the room.

The student, who was asleep in bed, said that he woke up to find the room on fire. He said that he had heard a loud noise coming from the window and when he looked out, he saw smoke. He immediately called for help and the fire department was called.

The flames were quickly brought under control and the student was taken to the hospital. He was treated for smoke inhalation and was released later that evening.

The fire is believed to have been caused by a short circuit in the electrical system. The Student Union is currently investigating the cause of the fire.

CAIRNS CLAMPS DOWN

Recently, Cairns council has introduced a new regulation concerning the sale of alcohol. The new law prohibits the sale of alcohol in the Cairns CBD during the week, with the exception of weekends.

The council has stated that the new law is necessary to reduce alcohol-related crime and antisocial behavior in the CBD.

The law has been met with mixed reactions. Some residents have welcomed the new law, as they believe it will help to make the CBD a safer place. Others, however, have criticized the new law, saying that it will unfairly restrict their freedom.

CLARES CLAMPS DOWN

Recently, Clare Pals, a regular attendee of the Clare Union, has been issued a regulation concerning her behavior. Clare has been asked to stop smoking in the Clare Union, as it is a public space and smoking is not allowed.

Clare has stated that she will comply with the new regulation, but she has expressed concern about the impact it will have on her social life.

The regulation has been met with mixed reactions. Some members of the Clare Union have welcomed the new regulation, as they believe it will make the Union a healthier and more pleasant place. Others, however, have criticized the new regulation, saying that it will unfairly restrict their freedom.

LEN'S LECTURE

One can hardly discuss technology today without mentioning the relationship between technology, science, and the environment. It is a complex issue that requires careful consideration.

Mr. Miller, a former professor of the University of California, has been invited to give a lecture on the topic. The lecture is set to take place on Thursday, February 27 in the Cairns Convention Hall.

The lecture is expected to be well attended, as Mr. Miller is a well-known and respected figure in the field of environmental science.

The lecture is scheduled to begin at 7:00 p.m. and is expected to last for approximately 90 minutes. The public is encouraged to attend and to ask questions of Mr. Miller at the end of the lecture.
Further revelations about the SAS men in Keynes College. After intensive interrogation it was found that the Ayatollah of Keynes College, Mr. Crabtree, had called them in to restore order to his "revolutionary" cause.

Each of the SAS men had the name of a student scrawled on their chest in invisible ink. It was only from the interrogations that the first SAS men's chest they found this out. The named students were all part of the group carrying out the "dirty protest" in Keynes.

The students have been covering the walls with excretia, and wearing blankets. This protest has been going on for six weeks now. Apparently the cleaners are under the impression that the "blanket wearing" was a new fashion. As for the "excretia" in walls, apparently the cleaners have not noticed.

I can now reveal what the Jez in Jez milieu stands for. Yes, the blonde super hero who showed his mother as soon as he became President has the same Jez. I'm not quite sure why they call him Jez, but I know it's a nickname, and a very nasty one at that. Actually it's probably that his mother wanted to rename him of half of UK probably wishes she had had a go at.

The new First Lady, Lucy Lent, has, I understand, already, taken to calling herself Narcy and keeping a revolver by her bedside. She has just sent her private office for going on that bit of news.

Finally news that Chris Jephottam is considering signing for Lester City for £800,000. I'm informed that he's not worried by the cold, like Jez, in a Lester City I'm concerned that he can't play football.

This article is not continued as expected by Jane Merritt, the Union Secretary. The editorial board unanimously oppose this action by the last member of the Union Committee.

Plans for the extension of the union building are on 'ice' as "Incaut" goes to press to report the withdrawal of the protest of Housekeeper which has the rooms above the proposed extension as a part of the jobs' salary.

The news is that the proposed extension will be delayed for a month or two until the past is out sorted.

If the plans go through however, the union will have the space on the ground floor next to the union building. Tony Horkess the Union President explained: "It will be done at the minimum cost to the union."

The news will be, the cost of the apartments will be frozen at a previous price, and the" new but not more than the previous price. Part of the unit will be sold to the students, as well as to the Executive for work to in.

He mentioned that the union might cost a coffee machine.

Tony Horkess told INCAUT: "We got somewhere to work, there really has to be somebody run the clerical staff, the instructors, the undergraduates, the union do not normally office outside the union."

The whole idea of an extension has been thrown in the air by the news that the university may be negotiating with National Westminster Bank over a new building.

In the meantime, the Union has sold the last of the new union building, a new Sheffield said to be 'seeing a number of people before my period of office is finished.' It's important to note, as part of the union plan, that an attempt is being made to stop all sales, hopefully, we can stop them together.

Meanwhile the issue of the extension to the present building is hanging in the balance.

In recent years there have been a proliferation of film versions of Mozart’s The Magic Flute. The original musical, which is often staged as a musical in the great opera houses of the world, is a collaborative work created for the original production. The opera is a complex piece, involving a wide range of acting styles and a high level of choreography. In the 1990s, a number of film versions were released, including those directed by Wolfgang Amadeus Mozart and Luc Besson. The most recent and successful film version of The Magic Flute is the 2018 film directed by Donald Elvira, which was released to critical acclaim and is currently showing in theaters around the world.

Joseph Losey's much discussed film version of Mozart's The Magic Flute has been shown several times recently. In the first of these, directed by Luc Besson, the story is told through the eyes of a young girl, the character of the Pasha, who is in love with the young girl. In the second, directed by Donald Elvira, the story is told through the eyes of a young boy, the character of the Pasha, who is in love with the young boy.

Artery

Richard Digence

Richard Digence is rapidly becoming one of Britain's most respected guitarists. His performances are often compared to those of Jimi Hendrix and John Mayall. The audience at the Artery was not disappointed, as they were treated to a display of musical skill and creativity that left them spellbound.

IT'S ALIVE!

This delicious film by Larry Cohen has absolutely nothing to recommend it—apart from the fact that it is the ultimate in baby jokes. How could anyone hope to make a credible film about a killer baby—a baby whose athletic performance is leaping and tumbling—and then go and mess up the film by turning it into a comedy? The result is a film that is even more unsympathetic to the baby than it is to the baby's mother. The baby, played by John Ryan, is a complete and utter disaster, and the film is a COMPLETE failure.

The baby's parents, played by Sally Kellerman and John Lithgow, are equally terrible. The baby's father, played by John Lithgow, is a complete and utter disaster, and the film is a COMPLETE failure.

The film is a COMPLETE failure.

Taxi Driver

Taxi Driver played to a capacity audience when shown "as a work of art" at the Caravelli, and deservedly so—it is a superb film. The plot, which is set on the streets of New York, is in turn a social and political commentary, and a study of the alienation of the city's inhabitants. The film is a masterpiece of urban realism and is a must for anyone interested in cinema.

Robert De Niro was supported by John Lithgow and Robert Duvall. The latter two are also on screen. Credit is due to Steven Spielberg for his direction and to Michael Chapman for his cinematography. The film is set in New York City.

The story revolves around Travis, a taxi driver who is disillusioned with life and who is on the verge of a nervous breakdown. He is married to a woman who is also a taxi driver, and he is constantly3 feeling the pressure of the city's inhabitants. The film is a masterpiece of urban realism and is a must for anyone interested in cinema.
**New Image For UKC?**

Slim-in and sunlamp set trend

The physical appearance of students at UKC seems to be a matter of great concern for the Sports Centre. With a focus on fitness and health, students are expected to present themselves well. The physical changes in the students are believed to have been a result of an increased emphasis on sports and fitness activities available at the Centre.

**WIGHT WATCHERS**

A recent study has shown that thinking about the amount of food eaten is a significant factor in weight loss. Those who successfully reduced their food intake and increased their physical activity showed a steady decrease in their body weight.

**SOLARIUM**

Under the direction of George Poppell, a new sunlamp has been installed at the Centre. This lamp is not only popular among students but also provides a great opportunity for those who want to keep their skin healthy during the summer months.

**ROUNING VICTORY HENLEY!**

Not content with winning at Denham, the UKC Rowing Club entered its first team in the Henley Women’s Regatta, February 21. The Henley Henley, head preparatory for the regatta.

The club, under the guidance of the highly skilled coach, trained hard all season, building up the necessary stamina and technique, having either five or six rowers in each boat.

As it was a pre-season race, the winning, the crew would give the Henley Henley a send-off. All the rowers would then go over the 1 mile course at full speed. The Henley Henley was indeed a success.

**CREDIT TO KEYNES**

When 8 teams played for the Indoor Inter College 4-side football trophies on Tuesday, 24th February, Keynes scored a resounding victory when both its teams reached the final.

**DISABLED**

In this, the Year of the Disabled, it is interesting to note that the interest the Sports Centre is taking in trying to provide facilities to allow disabled men and women to participate in sport.

When Monday, March 2, a film about disabled people playing in the sport was shown in Keynes Lecture Theatre, this was an introductory film and was meant to introduce the disabled to the possibilities the sport holds for them as an activity. On Thursday at 6 pm, the basketball club is helping to set up a club for disabled basketball players in wheelchairs.

**BEATEN AT THEIR OWN GAME**

UKC'S BEKIES

Those who had the pleasure and no doubt will have the pleasure in playing in this game will agree that this was a game played with all the spirit and commitment by both teams.

The game was even matched in terms of height and weight. The footballers (gals) had the edge on speed over the entire game. The players from the winning team all performed admirably, with the strikers being the standout performers.

The game followed a familiar pattern. The winning team found it easy to outplay the opposition, with the strikers being able to find space in the opposing defense to score goals. The winning team enjoyed a comfortable lead throughout the game and never looked like losing.

**PITCHES POSITION**

Dear Sir,

I refer to your article on pitches in the last issue of which I think you ought to have a word about the condition of our pitch. It is a fact that the pitch was destroyed by weedkiller and moss management has now been taken out of the hands of the club. A volunteer group of parents has been formed to look after the pitch, and it has now been marked out on the outfield on the number one cricket field by the club. The number two pitch, which should have been the number one pitch, should mean that the hockey teams next year and in future will have a good surface to play on.

With regard to the other pitches then the major problem remains with the number three pitch. The meeting of the Playing Field Management Committee, a group of club members, was drawn this week and the number of pitches that are available to the club was discussed. The committee agreed that one of the main issues to consider is the future of the pitch, and that it should be kept as an active pitch.

Yours sincerely,

Robert JONES

**SPORTS FED OPEN MEETING**

Anything Goes...

The Sports Federation held its second monthly meeting on Tuesday, April 24. With more than half the members in attendance, the meeting was well attended. The main topics discussed included the proposed increase in playing time, the merger of the rowing and sailing clubs, and the importance of charging students for using sports facilities.

**RESURFACING**

The tennis court is now undergoing resurfacing. The tennis committee has decided to invest in a new surface, which will cost the club $10,000. This decision was made after considering the options and finding that surfacing the courts would not only improve the quality of the playing surface but also reduce the number of injuries during games.

**SIDE EFFECTS**

Another side effect of the resurfacing is the potential decrease in sunlight. The tennis court is now covered with a new material that reflects the sunlight, which could potentially affect the game. The club is currently exploring options to mitigate this issue.

**CLUB MERGER**

The rowing and sailing clubs are considering a merger. The potential benefits of this merger include cost savings, increased membership, and the ability to offer more activities to members.

**LETTERS**

**ROYALANCE REBUFFED**

Dear Sir,

I take great exception to the letter decrying climbing in the last issue of your magazine. I believe that this sport is not only healthy but also provides a great outlet to relieve stress.

I can honestly say that this sport has brought me a lot of pleasure. So I don’t see why your readers should not enjoy it as well. Many individuals, both young and old, have taken up climbing as a hobby. It is a sport that can be enjoyed by people of all ages.

Yours sincerely,

John Smith
