E-mail: P.Tapadar@kent.ac.uk

Qualified Actuary

- Fellow of the IFoA, UK
- Fellow of the IAI, India

Industry Experience

- Standard Life Assurance Company, UK
- HDFC Standard Life, India

What do Actuaries do?

- **Analyse** past and present data to solve real-world business problems
 - **Design** insurance premiums
 - **Advise** on company pension plans
 - **Manage** financial assets and liabilities
 - **Work** in insurance, investment, banking, consultancies, governments and more!
- **Assess** risks and their financial impact to secure our financial future
- **Develop** a deep understanding of business operations
- **Stay informed** about economic trends and regulations
- **Communicate** complex data and financial concepts clearly

Why become an Actuary?

Actuaries are problem solvers and strategic thinkers who use their skills to help measure the probability and risk of future events. You must be bright, determined and ready to work hard.

- A **rewarding career** – a wide range of opportunities
- High **job satisfaction** – solving real-world business problems
- Intellectual **challenge** – lots of exciting new areas: *climate change, AI, driverless cars, ...*
- High **job security** – highly respected and in global demand
- Financial **reward** – excellent compensation for skills and experience
