

Children and Young Persons on site

Due to safeguarding and health and safety reasons we do not allow children and young persons under 18 on site during our open sessions or open events.

Our open sessions and activities are designed for adults and are facilitated as such, meaning that they are not suitable or engaging for children and young persons.

There are some specific events that are set up with children and young persons in mind such as the BioBlitz so we will always mark an event as suitable for children and young person's when appropriate.

The site is an open space, so we welcome parents walking through the site with their children and young persons, looking at what we are doing.

As a working garden please be aware of hazards and please respect the space that our volunteers work really hard on.
