What is a Fintech?

It depends.....

Fintechs are companies that rely primarily on technology and cloud services—and less so on physical locations—to provide financial services to customers.

McKinsey
& Company

Fintech is technology-enabled financial innovation, which is changing the way financial institutions provide – and consumers and businesses use – financial services

Bank of England

Fintech, or financial technology, is a term that describes the mobile applications, software and other technology that enable users and enterprises to access and manage their finances digitally.

A Better Definition?

Fintech –

The use of new technology
to redefine the way Financial
Services are delivered to the
benefit of Customers

A woman with dark skin and braided hair is shown in profile, looking towards the left. She has a focused and hopeful expression. The background is blurred, showing other people in a dimly lit setting, possibly a conference or event. The overall color palette is dark with some purple and blue tones.

How Fintechs Can Evolve

The Story of Stripe

Stripe's Origins

Founded by 2
Irish brothers
while at MIT

Founded
2010

Market Problem
to Solve:

Make it easier
for companies
to accept
payments on
the internet.

Payments
Platform in the
Cloud

Published APIs
to make it easy
to use

Public
Launch
2011

What did they learn?

As they understood their customer base they saw opportunity:

- Mainstream Banks were not serving SME's
- In the new digital world the banks were behind

Cash
Flow

Lack of
Service

Capital
Access

Costs

The traditional experience for SMEs

So where did they go over time...

They are starting to look like a bank!

The image shows the Stripe website's product menu and dashboard. The top navigation bar includes links for Products, Solutions, Developers, Resources, Pricing, Sign in, and Contact sales. The main menu is organized into three categories: Global Payments, Money Management, and Revenue and Finance Automation. Each category lists various services with icons and brief descriptions. A 'MORE' section on the right lists additional services like Payment methods, Link, Financial Connections, Identity, Atlas, and Climate. The dashboard on the right displays a search bar, a 'Today' section with a net volume of £3,528,198.72, and a 'Net volume from sales' section with a value of £39,274.29 and a +32% increase. Two line charts are also shown, one for the day and one for the month.

How did they do it?

Innovative use of
Technology

Orchestrated an
Ecosystem for
their Customers

GoCardless

Subscriptions, Recurring Payments

Traditional Payment methods can impact a business

Often limited to large businesses

Card
Interchange
fees can be
high

10–15% of
card
payments
fail

Cost of
becoming
a DDR
originator

Lack of
X-Border

Their Approach

Became a Direct Debit Originator in multiple countries

Facilitated moving the money across border once they collected it

Gave access to DDR payments to businesses that were too small to do it themselves

What are Fintechs often different

Common Characteristics

They Stay Focused

They often start in one use case and expand into adjacent areas.

Address a Customer Problem

Very focused upon a simple customer problem that mainstream businesses struggle to adequately address.

Apply Modern Technology and Tools

Not bound by legacy technology and apply new tech in imaginative ways.

Working with Fintechs

1. Using Fintech
Services

2. Partnering with
Fintechs

Using their Services

Look at where you are challenged in your business

Frustrated with existing
FS providers?

Can't accelerate Cash
Flow

Too much time spent on
low value tasks?

Don't forget Open
Banking – you own your
data!!

Traditional
Providers
underserve
some
markets

Partnering Opportunities

Understand the
type of Fintech
you are working
with – They
work at different
speeds!

As a Consumer...

Be clear about
the services
they offer

Be clear about
how you add value
to their proposition

—

Can you help
create something
greater than the
sum of the parts?

Regulated Industries

You might find
the Fintech is
looking for help
to understand

As a Partner..

Is there a good cultural Fit?

1. Fintechs are here to stay
2. Many different types
3. May be friend or foe
4. Certainly provide an opportunity
5. Approach with eyes open

Thank you
