

Wildlife and Habitat Survey Data

There is a wide range of species and habitat data held across the University relating to biodiversity. Below is a list of existing data sets that are available. If you would like to know more about this or access this data, please contact Emily Mason in the Sustainability Team in the first instance and she will advise who the data controller is for that set – sustainability@kent.ac.uk.

- Bird Survey transects
- BioBlitz annual data
- Newts
- Moths
- Bumblebees
- Butterflies
- Annual RSPB Bird count at KentCOG
- Small Mammal trapping
- Hedgerows
- Hedgehogs
- Tree Surveys
- Invasive Plant Species
- Total species count
- Ash trees
- Woodland Condition Assessment
- Woodland plant species
